Editors Select Favorite New Products, including STS Tracks, from 2014 Farm Progress Show

Hagie sprayer with tracks.

Farm Progress editors have spent the season roaming fall farm shows, looking for favorite products. Zeroing in on a couple each was a tough choice. Editors included Tom J. Bechman, Indiana Prairie Farmer; Josh Flint, Prairie Farmer; Lon Tonneson, Dakota Farmer; and Mindy Ward, Missouri Ruralist.

One of the favorite new products included a new track system for Hagie Manufacturing's high-clearance, single tank sprayer. The tracks fit between rows and cause less soil compaction than wheels. Track width compares to a 380/105/R50 tire. It has an 802 square inch footprint and creates just 8.4 pounds per square inch of pressure. Maximum field speed is 12 to 14 mph, and 20 mph on the road. Tracks are available on a limited number of Hagie STS12i and STS 15 sprayers.

Call Hagie, Clarion, Iowa, at 800-247-4885. See www.hagie.com for tests of the track system.
