Celebrating National Manufacturing Day

Hagie Manufacturing was one of 1,600 manufacturing plants that opened their doors to celebrate National Manufacturing Day on Friday, October 3rd. Iowa Central Community College asked Hagie to host this event to showcase to the public what a manufacturing career entails. There are currently twelve million individuals in the United States who have chosen a career in manufacturing.

Hagie Manufacturing and Iowa Central Community College work hand in hand when it comes to finding career opportunities for skilled workers, as many of Hagie Manufacturing's current employees attended Iowa Central Community College.

"We want to let people know that manufacturing is cool", stated David Maxheimer, Hagie Manufacturing's Director of Human Resources, who opened up the event with an overview of Hagie Manufacturing's history and culture.

Those in attendance were given an in-depth tour of Hagie Manufacturing's production facility and their evening concluded with virtual demonstrations of a weld simulator and robot as well as a paint simulator.

Hagie Manufacturing Company, located in Clarion, IA, optimizes our customers' growth by providing the most innovative crop protection solutions in the agriculture industry. After introducing the world's first self-propelled sprayer in 1947, Hagie Manufacturing Company has continued to be a pioneer in the industry with innovations such as front-mounted booms, hydrostatic drives and hydraulically-adjustable booms. A foundation with values built around employees, customers and innovation inspires sustained growth and success. Hagie Manufacturing is committed to providing state-of-the-art crop protection solutions while delivering a superior customer experience, yet continuing to build on family owned traditions and values.
